SITE / GENERAL	ADMISSION HOURS	Dispatch available Monday - Friday Loading hours	6:00 6:00	to to	18:00 15:00
	LANGUAGE	German - English - French - Dutch			
VEHICLES	ACCEPTED VEHICLES	Liquid phase: Vehicles/Tank Semi-trailers to be equipped with following coupling: TW DN 80 (3" Male) This coupling will need to be mounted and ready for use before presenting at the loading bay of ITC Rubis. It is of utmost importance that enough clearance exists to ensure the coupling unto the portable tank can be manipulated properly, this by presenting a U or V-chassis or placing the CTU at the end of the Vapour phase: Vehicles/Tank Semi-trailers to be equipped with following coupling: TW DN50 (or 1.5" BSP or 2" BSP) on top of the unit for portable tanks and preferably bottom for road tank trucks. All units with a top connection need to be equipped with safety rails
